Proticol S.A.. - NIT 900219129-8

Digium TDM811B

Precio unitario (unidad): \$1,142,592.57

Analog card that supports 1 FXS station and 1 FXO office interfaces for connecting analog telephones and lines through a PC. Full-length 32-bit 33MHz PCI 2.2-compliant. The VoiceBus technology, as first introduced on Digium's TDM2400P, allows the TDM800P to use an industry standard bus-mastering PCI interface, as found in millions of PCs worldwide, to maximize system compatibility and eliminate system conflicts. Alongside this card, they've also introduced their first software-based echo canceller, the High Performance Echo Canceller (HPEC). The HPEC is carrier-grade and provides host-based Toll-Quality echo cancellation on a global scale. The HPEC solution uses an algorithm that is compliant with the industry standard for echo cancellers, G.168.
